Biography

Born and raised in Naples, ALYSON is a DJ and music producer driven by a lifelong passion for music and electronic sounds. My connection with music started at an early age, growing into a journey that led me behind the decks and into music production.

Moving between Techno and Tech House, my sound blends groove, energy, driving rhythms and hypnotic textures, creating a dynamic sonic experience that moves between intensity and flow.

Active in the Naples club scene, I had also gained experience in Ibiza, bringing different influences and perspectives into my musical journey.

Through my sets, ALYSON aims to create more than just a dancefloor moment — a journey built on energy, movement, connection and shared emotions, where music becomes the language and dancing is the only thing that matters.
