

CAN'T STOP TALKING

CAN'T STOP TALKING are an angry dance-punk band that will make you want to kick a door off its hinges.

This band is entering 2027 with momentum, a growing catalogue and a live show built for discovery stages and increasingly ambitious festival crowds.

The four-piece brothers Jamie (vocals) and Daniel (guitar), alongside Hannah (bass) and Luca (drums), have built a reputation for turning fistfuls of aggression into irresistible hooks,

Jagged guitars collide with pounding rhythms, brazen vocals and basslines to deliver A collision of the visceral energy of post-punk with the swagger of alternative rock and the compulsive rhythm of a disco

Critics are calling them "a punch in the collective gut" and their music "A cannibalistic orgy of exquisite sounds".

Often mentioned alongside artists such as IDLES, Viagra Boys and Royal Blood, CAN'T STOP TALKING are never beholden to comparison. They stand confidently as their own enterprise.

On stage, headline shows across London's alternative circuit have cemented the band's reputation for explosive performances where crowd and band feed off each other in a volatile exchange of energy.
Autumn 2026 marks the beginning of CAN'T STOP TALKING's boldest chapter yet: with new tracks to be released unveiling a darker, heavier alternative rock sound and a striking new visual identity.
