Biography

Marilou is a Greek DJ and producer based in Thessaloniki, known for her powerful blend of raw, hypnotic and peak-time techno, progressively evolving into hard techno.

With over 15 years behind the decks and a decade long club residency, she has developed a strong understanding of dancefloor dynamics, combining driving grooves, dark atmospheres and carefully built intensity.

Her productions, released on Dreizehn Schallplatten, have earned placements on Beatport's Hard Techno charts, reflecting her distinctive approach to rhythm, tension and underground electronic music.

In November 2026, Marilou made her Vienna debut at BIOSPHERE, held at EXIL, following her selection for the CYBERSPACE Artist Lab.

Driven by a passion for underground techno, she continues to develop her sound and expand her presence across the European electronic music scene, delivering sets that balance hypnotic storytelling with raw, uncompromising energy.

Performance Details

Typical Set Length: 60–180 minutes (flexible depending on event format)

Crew Size: 1

Performance History: I'm Marilou, a DJ and electronic music producer from Greece with over 14 years of professional DJ experience and nearly a decade dedicated to techno.

Throughout my career, I've performed at numerous clubs and events, developing my own artistic

identity and expanding my presence beyond Greece.

My international experience includes performing at EXIL Vienna as part of BIOSPHERE in November 2026.

My productions have gained recognition on the Beatport Hard Techno charts, including my EP "Gravitus", released on Dreizehn Schallplatten.

I was also selected for CYBERSPACE Artist Lab 2026, further expanding my connections within the European electronic music scene.

I'm currently focused on building my international career, connecting with new audiences and bringing my sound to clubs and festivals across Europe.

Technical Requirements

Technical Rider:

3-4× Pioneer CDJ-3000 or newer , Pioneer DJM-900NXS2, DJM-A9 or DJM-V10 mixer. Professional booth monitors with independent volume control. Performance via Rekordbox USB.
