Biography

Having featured 2 separate track on BBC introducing, earning track of the week on indemand radio and being played on DJ Lee Butlers breakfast show all in the past 6 weeks, things are coming together nicely for Carousel Cartel. Working from the ground up we founded this band because we all had a lot to get off our chests. From mental health to politics, failed romances to nights out in the town, conspiracy theories, pubs closing down, anger, happiness, more nights out and so much in between!

Carousel Cartel, a 4 piece guitar band who play original music. Made by the people for the people! We have our own unique sound carving out a sweet spot between indie and rock & roll. We all come from working class backgrounds and it’s relayed in our lyrics. I mean, our new album is titled “Working to Live” does that not say it all? We know what you’re going through. Chances are, we’ve been there ourselves so our dream is to make your day a little better through our songs. We make relatable, passionate music and want to share it with the world!

We've had some legendary local influences such as Merry Hells John Kettle. We have been compared to the Stone Roses, Kasabian, Wolf Mother and Cage the Elephant, the laas, the Courteeners and even Oasis.

We could not be happier. Our 10 track album is out on all major streaming platforms so if you have a spare 35 minutes it’s not a bad way to pass the time, see for yourself! We’re always looking to push for bigger and better gigs and are steadily building up a good following, most recently selling out erooms - Skelmersdale and Arc:Hive - Liverpool in the space of just two weeks.
