Biography

Daniel Dee was born in 1982 in Rome, Italy. He started his career as a DJ at the age of 15 working at a famous club in Rome: NRG (of Ciampino). At that time, the Roman best club scene was dominated by the trance-progressive club genre which influenced him greatly. After his first year of performing, he was chosen as the resident DJ of the NRG club becoming one of the most important figures of the best Sunday evening in Italy. In 1998, he was played regularly on 'future zone' on Mondo Radio which was considered at the time the best progressive house radio show of the center region of Italy. It was on air every Sunday morning from 12 am to 01 pm. As time went by widening his musical knowledge, he played techno/progressive and started to work in music studios creating new original tracks which at the moment have been released on various records. Among these is the historical Bonzai Records. At the same time, he continued to gain experience in studios and playing in clubs, working with other top DJs of Italy. Most recently, Daniel Dee has put together original and innovative projects like: 'The Club' and 'Khoema', which are currently being proposed to the Roman club scene.
