Biography

DJ Reebok, born Tomes Georgescu, is a jungle and drum and bass producer and DJ based in Fort Lauderdale, Florida.

Coming up in hip hop culture, he started writing graffiti early on and got into scratch DJing at 19. That background gave him a strong sense of rhythm, texture, and raw expression—things that now define his sound.

After linking with artists like Opal and Fayt from Optikal Records, Reebok found himself drawn deeper into jungle, hardcore, and break-beats. The fast-paced sound, heavy low end, and layered detail matched the energy he was already chasing in his music. Over time, he developed a style that mixes classic jungle influence with sharp, clean production. Opening for acts such as Regal86, Lousy Lover, and DJ Frisco954 - Reebok's approach is hands-on and honest. Whether he's putting together a set or building out a track, it's always driven by feel and intuition.
