Biography

Elyotrope is the project of Léa Diverchy, a Toulouse-based DJ and producer shaping immersive sets at the crossroads of organic psychedelic bass and drum & bass.

Nine years behind the decks have shaped a sensitive, exploratory approach to electronic music: deep basslines, hypnotic textures and enveloping rhythms.

Her sets are built as sound journeys: carefully paced progressions that balance psychedelic detail with low-end weight and high-impact breaks. Rather than staying within one genre, Elyotrope follows the atmosphere, letting organic textures and shifting rhythms guide the experience.
