Biography

Hello, I hope you’re doing well. I’d like to share my 2027 demo set with you. I’m hoping you might take 30 minutes to listen to it and share your thoughts. What do you think of it? Does it make you want to dance? Does it put you in a party mood when you listen? Do you like the vibe? How do you find the transitions? Your feedback would be a huge help, as I’m really aiming to secure a spot at some festivals. In return, if I end up playing at a festival, I can offer you a free one-day pass for the day of my set. Thanks a lot, and have a great day! P.S. This set is protected by copyright and must not be shared with any third parties under any circumstances.
