Biography

Mike Sain't Louis is a Spanish musician, lyricist and artist from Móstoles, in the Community of Madrid. He presents himself as «el primer cantautor IA» (“the first AI singer-songwriter”): he writes the lyrics and directs the concept and image of each release, while the music and the vocal performance are generated with artificial-intelligence tools. He is the creator of Planeta Gayfolk (GAYFOLK), a project of albums and music videos set on an imaginary queer planet. He self-releases his catalogue through his own label, MIKE SAIN'T LOUIS, and offers it as a free download from his websites. The GAYFOLK trilogy comprises Descubierto un nuevo planeta llamado GAYFOLK (90 tracks) and Ojalá se pudiera viajar a GAYFOLK (86 tracks), both released on 24 July 2026, and El día de la liberación (99 tracks), released on 10 August 2026.
