Biography

MRBEL is an Italian DJ and music producer with a passion for electronic music, combining different sounds and influences to create his own style.

His sound is all about bringing together powerful, energetic drops with catchy and emotional melodies. He wants to combine the kind of basslines and drops that make you pull a bass face with melodies that actually make you feel something.

With influences from Tech House, Bass House and Melodic House, his goal is to make music that works on the dancefloor but also has its own character and identity.

Among his most significant achievements are:– Opening act at Presena Music Festival for Robin Schulz – Opening sets for Des3tt, EDMMARO, Kharfi, WhyNot and many others – Winner of the DJ contest at Aperibrolo Festival, Villa Summer Festival.

He is currently working on his first official releases: one of his tracks has already been selected by a label and is released. A mashup pack for commercial club use, along with some bootlegs and mashups, is available on SoundCloud, while new original productions are coming soon.
