Biography

The soundtrack of my childhood was interspersed with songs by Boney M, Vangelis or Jean Michel Jarre. When I started listening to music myself, I became passionate about Kraftwerk. When I was 7 years old, my parents gave me a Casio PT-1, with which I could play all those melodies.

I started as a DJ when I was 14, learning to mix songs by MC Hammer, Vanilla Ice, Salt & Pepa… and at the height of Acid House. I have lived the so-called “Ruta del Bakalao”, the nights of Attica, New World or Specka, while playing records in all kinds of clubs throughout Spain.

During the 90s, I was a resident DJ in several clubs in Spain, such as «Xcesso», «Hannover» or «Contacto». I was also invited to participate in raves at clubs like «Morgan», «Hook», «Drake», «Piramide», «Stress» or «Bachatta».

In 2000, I left the nightlife and DJ work and through my marketing agency I continued to be linked to this world but without ever leaving music production.

Tracks like «The Sun» (2002) or «Lucky» (2015), the Rob Base & DJ Ez Rock remake «It’s takes two» (2010) or the Mashup session «The Prodigy vs. The Chemical Brothers», have and continue to generate downloads and online reproductions.

In 2016, I met David Van Bylen, composer, producer, remixer and DJ, leaving me fascinated with his way of producing Mashups. He allowed me to create a set with his best remixes whose reproductions are counted in the thousands on the Internet.

In 2022 I returned to the night circuit and I continue to perform as a DJ at Remember Music and

EDM festivals. I am also a producer, covering different genres of electronic music and a specialist in Mashups.

During 2023, I have had great success by coining the term Reggaetronic, which is about fusing two or more songs (Mashup) between the Reggaeton and Electronic music genres, making the public of both genres enjoy my songs at the same time.

Tomorrow, who knows?

Performance Details

Typical Set Length: 60 minutes

Crew Size: 1
